Registration Criteria that presently apply.

(1) Natural or cultural heritage value

The object of this value is to identify trees that are of particular importance to the community due to their intrinsic heritage values.

A tree may be considered to be of natural or cultural heritage value when it is:

- (a) associated with a significant public figure or important historical event; or
- (b) of high cultural heritage value to the community or cultural group, including trees associated with aboriginal heritage and culture; or
- (c) associated with a heritage nominated place and representative of that same historic period.

(2) Landscape and aesthetic value

The object of this value is to identify trees that are of particular importance to the community due to their substantial contribution to the surrounding landscape.

A tree may be considered to be of landscape and aesthetic value if it is situated in a prominent location when viewed from a public place and it:

- (a) contributes significantly to the surrounding landscape based on its overall form, structure, vigour and aesthetic values; or
- (b) represents an outstanding example of the species, including age, size or habit; or
- (c) is an exceptional example of a locally native species that reached maturity prior to urban development in its immediate vicinity.

(3) Scientific value

The object of this value is to identify trees that are of particular importance to the community due to values associated with their ecological, genetic or botanical significance or ability to substantially contribute to the scientific body of knowledge and understanding.

A tree may be considered to be of scientific value when it:

- (d) is of botanical or genetic value and is not well represented elsewhere in the Territory.

Statement Against the Criteria

Trees covered by the Heritage Act 2004 are to be transferred to the Tree Register as a legislative requirement.
