(2) Landscape and aesthetic value

The object of this value is to identify trees that are of particular importance to the community due to their substantial contribution to the surrounding landscape.

A tree may be considered to be of landscape and aesthetic value if it is situated in a prominent location when viewed from a public place and it:

- (a) contributes significantly to the surrounding landscape based on its overall form, structure, vigour and aesthetic values; or
- (b) represents an outstanding example of the species, including age, size or habit; or
- (c) is an exceptional example of a locally native species that reached maturity prior to urban development in its immediate vicinity.

Statement against the Criteria

This tree is located in the built-up urban area to which the above criteria applies. The tree meets the criteria of landscape and aesthetic value defined under the *Tree Protection Act 2005*. The tree is in good health, has a balanced canopy and is an outstanding example of the species.

For the above reasons I am satisfied that the landscape and aesthetic value is high, and that the tree significantly contributes to this value as an exceptional example of a locally native species that reached maturity prior to urban development in the area.

Furthermore, I am not satisfied that the tree meets the criteria for cancellation of registration.
