### (3) Scientific value

The object of this value is to identify trees that are of particular importance to the community due to values associated with their ecological, genetic or botanical significance or ability to substantially contribute to the scientific body of knowledge and understanding.

A tree may be considered to be of scientific value when it:

- (a) is evidence of the former range limits or extent of the species or an ecological community; or
- (b) is endangered or vulnerable species that is endemic to the Territory or local region now reduced in range or abundance; or
- (c) demonstrates a likelihood of providing information which will contribute significantly to a wider understanding of natural history by virtue of its use as a research site, teaching site, type locality or benchmark site; or
- (d) is of botanical or genetic value and is not well represented elsewhere in the Territory; or
- (e) is a significant habitat element for a threatened native species.

### Statement against the Criteria

The trees in these sections are located on built-up urban area to which the above criteria applies. The trees meet the criteria of scientific value defined under the Tree Protection Act 2005.

### ACT Tree Register

#### **(Provisional Registration)**

Pursuant to Division 7.2 of the *Tree Protection Act 2005* as the Conservator of Flora and Fauna and for the reasons stated against the criteria above, I hereby make a decision under section 47 (1) to provisionally register the above trees on the ACT Tree Register.

Period of provisional registration: 1 year beginning from today. The provisional registration may end earlier if, prior to the end of that period, I decide to fully register, or not to fully register, the trees.
