### (2) Landscape and aesthetic value

The object of this value is to identify trees that are of particular importance to the community due to their substantial contribution to the surrounding landscape.

A tree may be considered to be of landscape and aesthetic value if it is situated in a prominent location when viewed from a public place and it:

- (a) contributes significantly to the surrounding landscape based on its overall form, structure, vigour and aesthetic values; or
- (b) represents an outstanding example of the species, including age, size or habit; or
- (c) is an exceptional example of a locally native species that reached maturity prior to urban development in its immediate vicinity.

### **Statement Against the Criteria**

This is one of five *Eucalyptus melliodora* within the subdivision of Bonner which has been nominated for inclusion to the ACT Tree Register. The trees are exceptional examples of the species which reached maturity prior to urban development. They contribute significantly to the surrounding landscape due to their size and stature. Bonner Estate is located near the existing Mulligans Flat Nature Reserve; the retention of these trees will provide connectivity to the reserve and nesting opportunities for nesting birds. Outstanding features of these trees include their age, large size, excellent form and good health.
