1 WATER SUPPLY RETICULATION

1.1 General

1.1.1 Responsibilities

1.1.1.1 General
Requirement: Provide water supply distribution and reticulation works in the location, to the lines, levels, grades and using the materials as documented.

1.1.1.2 Performance
Requirement: Conform to ICON Water’s Water Supply and Sewerage Standards

1.1.1.3 Precedence
Precedence: The technical requirements of, or any standard drawing provided by Icon Water, used in conjunction with and in conflict with this Specification, take precedence.

1.1.2 Cross references
General: The following documents are related to this Specification.

1.1.2.1 ACT Legislation
Road Transport (General) Act
Public Roads Act
Scaffolding and Lifts Act
Scaffolding and Lifts Regulation
Water and Sewerage Act
Water and Sewerage Regulations
Work Health and Safety Act

1.1.2.2 Specifications
Requirement: Conform to the following:

MITS 00 Preliminaries
MITS 01 Traffic Management
MITS 02 Earthworks
MITS 04 Flexible pavement construction
MITS 06 Concrete kerbs, footpaths and minor works
MITS 08 Incidental works
MITS 09 Landscape
MITS 10 Concrete works
1.1.3 Referenced documents

1.1.3.1 Standards

General: The following documents are incorporated into this Specification by reference:

**Australian standards**

- AS 1141 Methods for sampling and testing aggregates
- AS 1141.22 Wet/dry strength variation
- AS 1141.32 Weak particles (including clay lumps, soft and friable particles) in coarse aggregates
- AS 1214 Hot-dip galvanized coatings on threaded fasteners (ISO metric coarse thread series)
- AS 1281 Cement mortar lining of steel pipes and fittings
- AS 1289 Methods for testing soils for engineering purposes
- AS 1289.4.3.1 Soil chemical tests - Determination of the pH value of a soil – Electrometric method
- AS 1289.4.4.1 Soil chemical tests – Determination of the electrical resistivity of a soil – Method for sands and granular materials
- AS 1289.5.6.1 Soil compaction and density tests – Compaction control test – Density index method for a cohesionless material
- AS 1289.5.7.1 Soil compaction and density tests – Compaction control test – Hilf density ratio and Hilf moisture variation (rapid method)
- AS 1432 Copper tubes for plumbing, gas fitting and drainage applications
- AS/NZS 1477 PVC pipes and fittings for pressure applications
- AS/NZS 1554 Structural steel welding
- AS/NZS 1554.1 Welding of steel structures
- AS 1579 Arc-welded steel pipes and fittings for water and waste-water
- AS 1627 Metal finishing – Preparation and pre-treatment of surfaces
- AS 1627.4 Abrasive blast cleaning of steel
- AS 1646 Elastomeric seals for waterworks purposes
- AS 1657 Fixed platforms, walkways, stairways and ladders – Design, construction and installation
- AS/NZS 2032 Installation of PVC pipe systems
- AS/NZS 2033 Installation of polyethylene pipe systems
- AS 2129 Flanges for pipes, valves and fittings
- AS/NZS 2280 Ductile iron pipes and fittings
- AS/NZS 2566 Buried flexible pipelines
- AS/NZS 2566.2 Installation
- AS/NZS 2638 Gate valves for waterworks purposes
- AS/NZS 2638.1 Metal seated
- AS/NZS 2638.2 Resilient seated
- AS 2832 Cathodic protection of metals
AS 2832.1  Pipes and cables
AS 2832.2  Compact buried structures
AS/NZS 3500  Plumbing and Drainage
AS/NZS 3500.1  Water services
AS/NZS 3518  Acrylonitrile butadiene styrene (ABS) compounds, pipes and fittings for pressure applications
AS 3571  Plastics piping systems – Glass-reinforced thermoplastics (GRP) systems based on unsaturated polyester (UP) resin
AS 3571.2  Pressure and non-pressure water supply (ISO 10639:2004, MOD)
AS 3600  Concrete structures
AS 3681  Application of polyethylene sleeving for ductile iron piping
AS 3688  Water supply – Metallic fittings and end connectors
AS/NZS 3690  Installation of ABS pipe systems
AS 3705  Geotextiles – Identification, marking, and general data
AS/NZS 3750  Paints for steel structures
AS/NZS 3750.4  Bitumen paint
AS/NZS 3750.19  Metal primer – General purpose
AS/NZS 3862  External fusion-bonded epoxy coating for steel pipes
AS/NZS 3879  Solvent cements and priming fluids for use with unplasticised PVC (PVC-U and PVC-M) and ABS and ASA pipes and fittings
AS 3952  Water supply – Spring hydrant valve for waterworks purposes
AS 3996  Access covers and grates
AS/NZS 4020  Testing of products for use in contact with drinking water
AS/NZS 4087  Metallic flanges for waterworks purposes
AS/NZS 4129  Fittings for polyethylene (PE) pipes for pressure applications
AS/NZS 4130  Polyethylene (PE) pipes for pressure applications
AS/NZS 4158  Thermal-bonded polymeric coatings on valves and fittings for water industry purposes
AS 4321  Fusion-bonded medium-density polyethylene coating and lining for pipes and fittings
AS/NZS 4331  Metallic flanges
AS/NZS 4331.1  Steel flanges
AS/NZS 4441  Oriented PVC (PVC-O) pipes for pressure applications
AS/NZS 4680  Hot-dipped galvanized (zinc) coatings on fabricated ferrous articles
AS/NZS 4765  Modified PVC (PVC-M) pipes for pressure applications
AS 4794  Non-return valves – Swing check and tilting disc
AS 4795  Butterfly valves for waterworks purposes
AS 4795.1  Wafer and lugged
AS 4795.2  Double flanged

### 1.1.3.2 Other publications

- **ASTM A240/A240M**: Standard specification for chromium and chromium-nickel stainless steel plate, sheet and strip for pressure vessels and for general applications
- **ASTM A276**: Standard Specification for Stainless Steel Bars and Shapes
- **BS 3416**: Specification for bitumen-based coatings for cold application, suitable for use in contact with potable water

**Plastics Industry Pipe Association (PIPA)**

- **POP001-2013**: Electrofusion jointing of PE pipe and fittings for pressure applications
- **POP003-2011**: Butt fusion jointing of PE pipes and fittings – recommended parameters
- **POP007-2006**: Metal backing flanges for use with polyethylene (PE) pipe flange adaptors
- **POP102-2014**: Solvent cement welding of PVC pipe
- **POP202-2008**: PVC and PE pressure pipe installation on curved alignments

**Water Services Association of Australia (WSAA)**

- **WSA 03-2011**: Water Supply Code of Australia

### 1.1.4 Standards

#### 1.1.4.1 General

Standard: To *ICON Water’s Water Supply and Sewerage Standards.*

- PVC-U installation: To AS/NZS 2032.
- PVC-M installation: To AS/NZS 4765
- Copper pipe and fittings installation: To AS 4809.
- Proprietary products: To *TCCS Products previously considered for use list*

### 1.1.5 Interpretation

#### 1.1.5.1 Abbreviations

General: For the purposes of this Specification the following abbreviations apply:

- **D**: External diameter of the pipe.
- **DI**: Ductile Iron.
- **DICL**: Ductile Iron Cement Lined
- **GRP**: Glass Reinforced Plastic.
- **NATA**: National Association of Testing Authority.
- **PE**: Polyethylene.
1.1.6 Hold points and witness points

1.1.6.1 Notice
General: Give written notice to the Authorised Person so that the documented inspection and submissions may be made to the **Hold point table** and the **Witness point table**.

| **Execution** | | | |
| 3E.2 | Excavation for water supply – Foundation | Identify any unsuitable material and proposed actions | 1 working day prior to preparation of foundations | Authorised Person |
| 3E.3 | Excavation for water supply - Foundation | Confirm soil type with design | 1 working day |
| | | Additional excavation and backfill if rock encountered at foundation level. | 1 working day |
1.2  Materials

1.2.1  General

1.2.1.1  Authorised products and materials
Products and materials: Provide only products and materials authorised by Icon Water.

This is a HOLD POINT.

Unauthorised material: Remove unauthorised or non-conforming materials from the site within 24 hours.

1.2.1.2  Conformance with manufacturer’s recommendations
Requirement: Conform to the requirements of the manufacturer’s recommendations for handling, transport and storage of materials and in a manner to prevent damage or deterioration or excessive distortion. Inspect all products and materials at the time of delivery and reject products and materials not in conformance with Icon Water’s Water Supply and Sewerage Standards and the manufacturer’s recommendations.

This is a WITNESS POINT.

On site storage: Store pipe fittings, valves, seals and other components as follows:

> Maintain protective crating or packaging until immediately before use.
> Stack piping to avoid ovalisation.
> Support all fittings and pipes off the ground.

Damaged or defective materials: Do not use damaged or defective materials, including coatings and linings, outside the manufacturer’s recommended limits and the following:

> Faded/discoloured plastics, plastic coated pipes, fittings and appurtenances.
> DI and steel pipes and fittings with damage to linings in excess of 20% of the lining thickness.
> Plastics coated pipes, fittings and appurtenances with damage to coating in excess of 20% of the coating thickness.
1.3 **Execution**

1.3.1 **Provision for traffic**

1.3.1.1 **General**
Requirement: Conform to *MITS 01 Traffic Management*.

1.3.2 **Site establishment**

1.3.2.1 **Survey**
Requirement: Conform to *MITS 00A General Requirements*.

1.3.3 **Excavation**

1.3.3.1 **General**
Excavation: Conform to *Icon Water’s Water Supply and Sewerage Standards, MITS 03A Trenching for underground services and MITS 02B Bulk Earthworks*.

Bedding, support and backfill material: Unless otherwise documented, to *Icon Water’s Water Supply and Sewerage Standards*.

Tolerances: Install water mains, in-line structures, property services and meters in conformance with *Icon Water’s Water Supply and Sewerage Standards*.

1.3.3.2 **Trenchless technology**
Excavation: Conform to *Icon Water’s Water Supply and Sewerage Standards*.

1.3.3.3 **Foundation**
Confirmation: Confirm surrounding soil type with design. Notify Authorised Person if not consistent with the design.

This is a **WITNESS POINT**.

Notice: Give notice of any area of the foundation including the sides of the trenches that may contain material that is inadequate to support the proposed water supply infrastructure. Where soft material occurs, the Authorised Person may require the use of alternative bedding material.

This is a **HOLD POINT**.

Unsuitable trench and foundation material: Remove and dispose of inadequate trench and foundation material as directed by the Authorised Person to *MITS 03A Trenching for underground services* and replace the material to *Icon Water’s Water Supply and Sewerage Standards*.

Rock foundation: Remove or cut back exposed boulders in trench bottoms.

This is a **WITNESS POINT**.
1.3.4  Installation, embedment and backfill

1.3.4.1  General
Bedding and pipe support: To *Icon Water’s Water Supply and Sewerage Standards*.

Minimum cover: To *Icon Water’s Water Supply and Sewerage Standards*.

1.4  Completion

1.4.1  Submissions
Work as Executed Records: To *Icon Water’s Water Supply and Sewerage Standards* and *MITS 00B Quality Requirements*.

1.4.2  Connections to existing water mains
Acceptance testing: Complete acceptance testing to the satisfaction of Icon Water before connection to existing water mains.

2  MEASUREMENT AND PAYMENT

2.1  Measurement

2.1.1.1  General
Payments made to the Schedule of Rates: To *MITS 00 Preliminaries*, this Specification, the Drawings and the *Pay Items table*.

2.1.1.2  Methodology
The following methodology will be applied for measurement and payment:

- Allow for all work, materials, testing and quality assurance requirements in each Pay Item.
- Excavation, bedding, support and backfill material for sewer pipes: Paid under this Specification.
- Miscellaneous minor concrete work not included in the pay items in this Specification: Conform to *MITS 10 Concrete works*.
- Backfill under roads, paths and driveways: Extra over to *MITS 03H Road openings and restorations*.
- Disposal of surplus trench spoil: To *MITS 02B Bulk earthworks*.
- Removal of existing water supply pipes and structures: To *MITS 03A Trenching for underground services*.
- All costs associated with removal of water from excavations shall be included within respective excavation rates for water supply pipes.
- No Additional payment will be made for excavation in rock, overbreak of trench due to ground conditions or over excavation of trenches.
## 2.2 Pay items

### Table 3E- 3 Pay items table

<th>Unit of measurement</th>
<th>Schedule of rates scope</th>
</tr>
</thead>
</table>
| **3E.1** | Water supply pipes | Linear metre of pipe installed measured at the centreline of the trench | All activities associated with construction of water supply pipes including excavation of trenches in all types of material encountered including rock, over excavation for bedding, shoring, additional excavation at structures, bedding, laying, jointing, including wrapping of DICL pipes or filter fabric if specified, joint deflections or curvature of the pipe, backfilling and compaction. This pay item shall also include pipe cutting, tracer wire for plastic pipes, marking tape, connection to existing and/or new pipes and making good pipes damaged during the works. Separate pay items shall be included in the Contract for each pipe material, class of pipe and pipe diameter. For example;  
  3E.1.1 100 PVC-M PN16  
  3E.1.2 225 PVC-M PN16  
  3E.1.3 375 DICL  
  Etc... |
| **3E.2** | Water supply pipe bends | Number | All activities associated with construction of water supply pipe bends including supply, installation, jointing, compacting backfill around the connection and all work to the pipes in order to make the connection. A separate pay item shall be included in the Contract for each pipe size. For example;  
  3E.2.1 100 x 22.5° bend  
  3E.2.2 150 x 11.25° bend  
  3E.2.3 225 x 45° bend  
  Etc... |
| **3E.3** | Water supply pipe tees | Number | All activities associated with construction of water supply pipe tees including supply, installation, jointing, compacting backfill around the connection and all work to the pipes in order to make the connection. This pay item shall include tees for hydrants. A separate pay item shall be included in the Contract for each pipe size. For example;  
  3E.3.1 100 x 75 hydrant tee  
  3E.3.2 150 x 100 tee  
  3E.3.3 150 x 150 tee*  
  Etc... |
<table>

</thead>
</table>
| 3E.4    | Water supply pipe reducers         | Number              | All activities associated with construction of water supply pipe reducers including supply, installation, jointing, compacting backfill around the connection and all work to the pipes in order to make the connection. A separate pay item shall be included in the Contract for each pipe size. For example;  
3E.4.1 150-100 reducer  
3E.4.2 225-150 reducer  
Etc...  |
| 3E.5    | Fire hydrants                      | Number              | All activities associated with construction of fire hydrants on water supply pipes including supply, installation, jointing, compacting backfill around the connection and all work to the pipes in order to make the connection. This pay item shall also include risers, hydrant box and surround, duck foot bends on dead ends, tracer wire, marker posts or indicator plates and blue hydrant RRPM’s. A separate pay item shall be included in the Contract for each hydrant size and configuration.  
3E.5.1 Inline DN80 Spring Hydrant  
3E.5.2 Dead end DN80 Spring Hydrant  
3E.5.3 DN150 High Capacity Hydrant  |
| 3E.6    | Sluice valves                      | Number              | All activities associated with construction of sluice valves on water supply pipes including supply, installation, jointing, compacting backfill around the connection and all work to the pipes in order to make the connection. This pay item shall also include the valve box and surround and marker posts or indicator plates. A separate pay item shall be included in the Contract for each pipe size. For example;  
3E.6.1 100 SV  
3E.6.2 225 SV  
Etc ... |
