**Request for information**

**(Please provide as much detail as possible, for example subject matter and relevant dates, and also provide details of documents that you are not interested in.)**

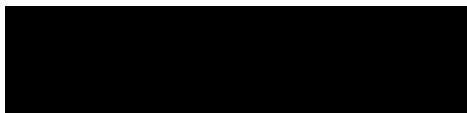

Under the Freedom of Information Act 2016 I want to access the following document/s (\*required field):

The traffic survey reports for Empire Circuit, Forrest and Arthur Circle, Forrest that shows traffic volume, speed data and crash history on these local streets. I am also seeking a copy of a traffic management plan or report that provides evidence that the Arthur Circle/Empire Circuit intersection is not a priority for road safety improvement and that traffic calming is not needed along these two streets. A serious 3 car crash at this intersection today prompted me to submit this request.

I do not want to access the following documents in relation to my request::

Thank you.  
Freedom of Information Coordinator

## **1 Introduction**

The Traffic Management and Safety (TMS) section of Roads ACT, in the Transport Canberra and City Services Directorate (TCCS), is responsible for monitoring and managing the safety and operating conditions of the existing road network in the ACT.

TMS uses a ranking system to assess the need for, and priority of, improvements at intersections and mid-blocks.

## **2 The Ranking Process**

A review of the ACT crash history over the last five-year period (2016 – 2020) clearly indicates that specific crash types have a greater potential for severity than others. Hence, the ranking system takes into account all casualty crashes as well as those Property Damage Only (PDO) crash types which have a greater than 5% casualty rate in the last five-year period.

The system then weights the severity of these crashes to determine an overall score for each location. The weights applied are 16 for a Fatal Crash, 4 for an Injury Crash and 1 for a PDO Crash. Locations are then ranked according to their final scores.

Rankings for the top 300 intersections and 150 mid-block locations are generated for the most recent seven-year and two-year periods. This ensures that trends over time (7 years) as well as any recent increasing trends (2 years) are identified. The top ranked locations are then considered for improvement under the future Capital Works Programs.

## **3 The 2020 rankings**

The 2020 intersection and mid-block rankings were produced using the methodology outlined above.

- The 7-year and 2-year intersection rankings are presented in Appendices 3 and 4.
- The 7-year and 2-year mid-block rankings are presented in Appendices 5 and 6.

Severity scores of at least 56 for the 7-year ranking and 24 for the 2-year ranking were used as cut-off points. All locations scoring above these two threshold values will be reviewed in more detail, in priority of their ranking, and projects identified for inclusion in 2021/22 Capital Works Programs.

Lists of the top ranked intersection and mid-block locations are presented in Section 4.

## 5 The Federal Black Spot Program

While the ACT ranking system identifies locations with a high potential for casualty crashes, the Federal Government sponsors a road safety program – the Black Spot Program - to treat only locations with a proven history of casualty crashes.

Different eligibility criteria (casualty crashes in the most recent five-year period and a project proposal with a minimum Benefit-Cost ratio) are used to identify projects for funding under the Black Spot Program.

A list of locations (top 25 intersections and 10 mid-blocks) eligible for Federal Black Spot funding is presented below:
