Dear 

Freedom of information request: Reference - 19-002

I refer to your application made under the *Freedom of Information Act 2016* (the Act), received by Transport Canberra and City Services Directorate (TCCS) on 10 January 2019, in which you sought access to:

- number of fines issued for dog off-leash offences, for 2017 and 2018;
- number of times that dog off-leash fines have not been issued when rangers observe off-leash dogs for 2017 and 2018;
- number of times that rangers have issued warnings for off-leash dogs for 2017 and 2018;
- any policy regarding failure to issue off-leash fines or circumstances where fines may not be issued; and
- documents providing suitable authority for documents referenced in the above.

I am an Information Officer appointed by the Director-General under section 18 of the Act to deal with access applications made under Part 5 of the Act.

TCCS is required to provide a decision on your access application by 8 January 2019.

Decision on access

Searches were completed and seven documents (30 pages) were identified that fall within the scope of your request. The information includes reports and summary data from TCCS databases which includes the information you are seeking.

In applying the public interest test set out in section 17 of the Act, I consider it is in the public interest to release the documents and provide full access.

I have included at [Attachment A](#) to this decision the schedule of relevant documents. This provides a description of each document that falls within the scope of your request and the access decision for each of the documents.

Statement of Reasons

In reaching my access decision, I have taken the following into account:

The Act, in particular:

Factors favouring disclosure

- Schedule 2.1 (a)(i) promote open discussion of public affairs and enhance the government's accountability.
- Schedule 2.1(a)(iii) inform the community of the government's operations including the policies, guidelines and codes of conduct followed by the government in its dealing with members of the community.

Factors favouring nondisclosure in the public interest

- Schedule 2.2(a)(ii) prejudice the protection of an individual's right to privacy or any other right under the *Human Rights Act 2004*.

In making my decision, I considered the public interest reasons that support release of the identified documents. The topic of dog management and attack has been an area of particular public interest over recent years and has resulted in changes to the *Domestic Animal Act 2000* in response to public discussion about dog attack and responsible dog ownership.

The information contained in the documents is also about the government's operations and the policy framework that supports such operations.

I also considered if information contained in the documents might prejudice the protection of an individual's rights.

In particular, I considered information about the location of an offence which could be a residential address. Addresses in the documents do not include the street number of an offence location and in this respect the privacy of any particular individual is not prejudiced. In some cases, neighbours or others might be able to deduce where a penalty was imposed however I believe that this could only occur if additional information was already known by a person. I weighed this against the public interest in identifying the operations of an agency and decided that the information did not fall under the privacy factor (Schedule 2.2(a) (ii)) and, further, was in the public interest to release under factors contained in Schedule 2 of the Act.

I did not consider the names of officers who processed the infringement notice to be personal information subject to privacy as the work is part of the duties for which the person is employed and this information is not protected.

The database report includes records that you have not requested but I am advised that the parameters of a report that only includes the information you are seeking is not readily available and, to this end, see no reason to redact or otherwise tamper with the report to remove the out-of-scope information.

There is no specific report capturing the number of times that dog off-leash fines have not been issued when rangers observe off-leash dogs for 2017 and 2018 although such information can be extrapolated from where warnings rather than fines have been

issued though it may not capture all instances where a fine was not given to dogs observed off-leash.

Additional documents that provided authority for the documents referenced in your request include legal documents. These are the *Domestic Animals Act 2000* and associated instruments and the *Magistrates Court (Domestic Animals Infringement Notices) Regulation 2005*. I have not provide the legal documents as these can be found on the ACT Legislation Register (www.legislation.act.gov.au). I am not required to provide documents which are available as part of a public register established under a Territory law (Section 45(c) of the FOI Act).

Charges

No fee is payable as the number of pages being released is within the fee-free threshold.

Online publishing – disclosure log

Under section 28 of the Act, TCCS maintains an online record of access applications called a disclosure log. Your original access application, my decision and documents released in response to your access application will be published in the TCCS disclosure log from 3 days after the date of this decision. REGULATORY COMPLIANCE AND ENFORCEMENT

The approach we take to our regulatory decisions and actions.

Licensing and Compliance aims to adopt the right regulatory response for the right situation.

Principles

The key principles underpinning our regulatory activities and decisions are:

Risk-based - We will apply a risk-based compliance approach to ensure that our resources are targeted to where the risks of harm, unsafe practices or misconduct are the greatest, thereby strengthening our capacity to take action where the community, animals and the environment are most at risk. Licensing and Compliance will prioritise its actions based on a range of considerations, including the following:

- conduct that causes harm or risk to people, animals, public land, territory assets, or the environment;
- conduct that is systemic and is likely to have a detrimental effect on the community and/or the environment, and
- conduct that demonstrates a blatant disregard for the law.

Proportional – we will have regard for the current harm/risk, the experience and past conduct of a person or business when determining our regulatory response.

Effective – we will apply the appropriate compliance tool to ensure that our regulatory interventions are responsive to the relevant circumstances and will achieve the desired outcomes. We will aim for consistent enforcement outcomes for similar conduct.

Constructive – we will provide advice, guidance and support to help business and the community comply with relevant laws.

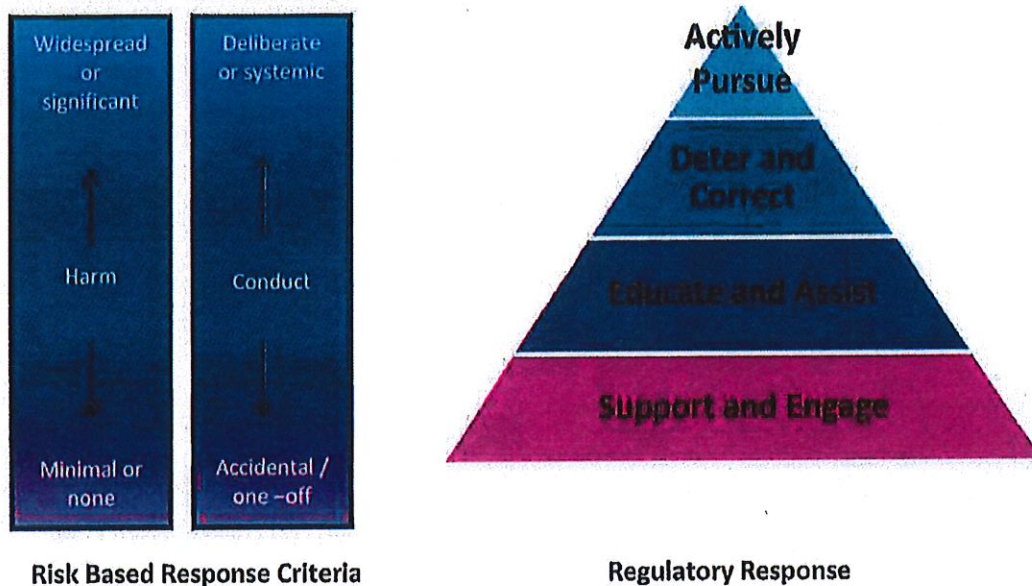

Accountability – we are willing to explain our decisions whilst protecting the integrity of our investigations. We will balance confidentiality requirements with the need to inform businesses and the community about our regulatory actions.

Transparency – we will demonstrate impartiality and act with integrity. The community and those who we regulate will know what to expect when engaging with us.

Timeliness – we will conduct our investigations, compliance activities and enforcement action as efficiently as possible. We will be adaptable to responding to new priorities, technologies and changing environments.

Response model

The diagram below illustrates Licensing and Compliance's approach to fostering compliance and management of non-compliance. Licensing and Compliance encourages compliance through education but will apply escalating enforcement actions to those that demonstrate a disregard for the law and whose conduct has, or is likely, to cause harm to consumers, business, the community or the environment

Governance

Our regulatory activities are undertaken within a governance framework to ensure efficient and effective allocation of resources and adherence to our guiding principles.

Committees

Licensing and Compliance operates a Regulatory Advisory Committee which oversees regulatory activity to ensure consistency of approach. The Regulatory Advisory Committee considers the most appropriate regulatory action at an important stage of, or the conclusion of, an investigation. This may include taking no further action. This Committee will also consider complex applications for a licence or registration. The decisions of the committee are underpinned by our risk-based principles.

Compliance frameworks for specific regulatory approaches

Licensing and Compliance has documented a variety of compliance and enforcement frameworks for sector-specific regulatory activities and industries. These include Land Use Licensing, Domestic Animal Services and Animal Welfare, City Services and Regulation and Compliance and Investigation.

Regulatory toolkit

To ensure we achieve the right regulatory approach for the right situation, and provide rigorous support for our statutory office holders, we will draw on a range of activities and powers as allowed to encourage and enforce compliance with the laws that we regulate.
