ACT Tree Register

Provisional Tree Registration

Nomination RT1261 Kambah

Species: *Eucalyptus blakelyi* (Blakely's Red Gum)

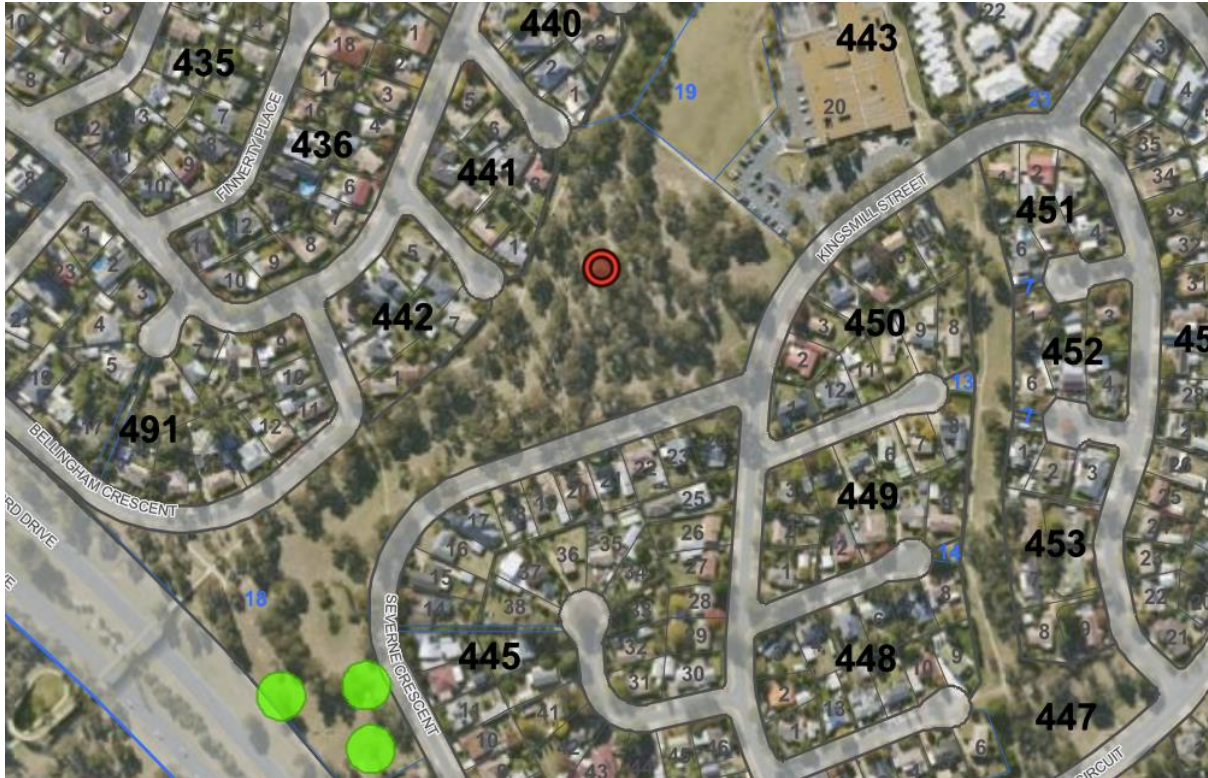

Location: PRZ1 Urban Open Space Block 18 Section 443, Kambah near 7 Doherty Place

ACT Tree Register

Aerial image showing location of the tree

Location of *Eucalyptus blakelyi* RT1201 in Kambah

Field	Details of tree
Street address	Near 7 Doherty Place, Kambah
Location	PRZ1 Urban Open Space Block 18 Section 443, Kambah
Botanical name	<i>Eucalyptus blakelyi</i>
Common name	Blakely's Red Gum
Tree height	19.3m
Canopy broadest diameter	12.5m
Description of radial measurement	

ACT Tree Register

Field	Details of tree
Canopy radial measurement	R1: 6.9m R2: 5.9m R3: 5.6m R4: 6.3m
Trunk circumference	339cm
Number of trunks	1
Tree Protection Zone	Canopy plus two (2) metres
Grid co-ordinates GDA 2020 Lat/Long	Latitude: 35.38734° S Longitude: 149.07012° E

Registration Criteria that presently apply, other criteria may apply after further assessment.

(3) Scientific and ecological value

The object of this value is to identify trees that are of particular importance to the community due to values associated with their ecological, genetic or botanical significance or ability to substantially contribute to the scientific body of knowledge and understanding.

A tree may be considered to be of scientific and ecological value when it:

- a) is evidence of the former range limits or extent of the species or an ecological community; or
- (b) is a listed threatened native species that is now reduced in range or abundance; or
- (c) demonstrates a likelihood of providing information which will contribute significantly to a wider understanding of natural history by virtue of its use as a research site, teaching site, type locality or benchmark site; or
- (d) is of botanical or genetic value and is not well represented elsewhere in the Territory; or
- (e) is a significant habitat element, including mature native trees (including hollow-bearing trees) for a threatened native species; or

ACT Tree Register

(f) provides exceptional contributions to habitat, habitat connectivity or the surrounding ecosystem and is/are irreplaceable.

Statement against the Criteria

This tree is located on built-up urban area to which the above criteria apply. The tree meets the criteria of Scientific and Ecological value as defined under the *Urban Forest Act 2023*.

This is an exceptional example of a local keystone species that existed prior to urban development in the area. It has multiple hollows and is providing significant habitat and connectivity elements for native birds, bees and other fauna. Whilst the tree is now surrounded by mature planted eucalypts, it still stands apart from the rest due to its height and very large trunk circumference.

For the above reasons I am satisfied that the scientific and ecological value is high, and that the tree significantly contributes to the above value in the surrounding area.

Furthermore, I am not satisfied that the tree meets the criteria for cancellation of registration.

Number RT1261 Kambah

Eucalyptus blakelyi (Blakely's Red Gum)

ACT Tree Register

(Provisional Registration)

Pursuant to Division 4.3 of the *Urban Forest Act 2023* as the Conservator of Flora and Fauna and for the reasons stated against the criteria above, I hereby make a decision under section 55 (1) to provisionally register the above tree on the ACT Tree Register.

Period of provisional registration: 1 year beginning from today. The provisional registration may end earlier if, prior to the end of that period, I decide to fully register, or not to fully register, the tree.
