ACT Tree Register

Field	Details of tree
Street address	Opposite 12 Draper Crescent, Higgins
Location	PRZ1 Urban Open Space, Block 1 Section 47, Higgins
Botanical name	<i>Eucalyptus blakelyi</i>
Common name	Blakely's Red Gum
Tree height	22.5m
Canopy broadest diameter	21m
Description of radial measurement	
Canopy radial measurement	R1: 9.0m R2: 14.2m R3: 7.6m R4: 6.8m
Trunk circumference	353cm
Number of trunks	1
Tree Protection Zone	Canopy plus two (2) metres
Grid co-ordinates GDA 2020 Lat/Long	Latitude: 35.235066° S Longitude: 149.024782° E

ACT Tree Register

Registration Criteria that presently apply, other criteria may apply after further assessment.

(3) Scientific and ecological value

The object of this value is to identify trees that are of particular importance to the community due to values associated with their ecological, genetic or botanical significance or ability to substantially contribute to the scientific body of knowledge and understanding.

A tree may be considered to be of scientific and ecological value when it:

- a) is evidence of the former range limits or extent of the species or an ecological community; or
- (b) is a listed threatened native species that is now reduced in range or abundance; or
- (c) demonstrates a likelihood of providing information which will contribute significantly to a wider understanding of natural history by virtue of its use as a research site, teaching site, type locality or benchmark site; or
- (d) is of botanical or genetic value and is not well represented elsewhere in the Territory; or
- (e) is a significant habitat element, including mature native trees (including hollow-bearing trees) for a threatened native species; or
- (f) provides exceptional contributions to habitat, habitat connectivity or the surrounding ecosystem and is/are irreplaceable.

Statement against the Criteria

This tree is located on built-up urban area to which the above criteria apply. The tree meets the criteria of Scientific and Ecological value as defined under the *Urban Forest Act 2023*.

This tree is a mature remnant specimen of a local keystone species that existed prior to urban development in the area. The tree provides significant habitat and connectivity values through its hollow-bearing structure and proximity to adjacent rural land.

For the above reasons I am satisfied that the scientific and ecological value is high, and that the tree significantly contributes to the above value in the surrounding area.

Furthermore, I am not satisfied that the tree meets the criteria for cancellation of registration.
